Introduction:

QQM Suite 1.08 is a suite of applications, which allows you to create and play quizzes on the following platforms:

Mobile Phone
Palm
Windows PC

You can also create Worksheets and Answer Keys, and WebPages from your quizzes.

You can define question types, categories, levels of difficulty, comments for correct and incorrect answers, and the time for each question. As each question is entered it can be previewed and tested.

Once you have made you quiz you save it as a stand-alone game, playable on Palm, Mobile Phone or PC.

Teachers: Write a quiz and have the results sent through SMS to your phone. Write a quiz and have the results sent by email to your email account.

SMS results example: "Results for Bob - Quiz: My_quiz - No of questions 201,Number wrong: 20, Number Right: 20, Answered 40."

Free to try for 30 days.

Teachers:

Each stand-alone game is password protected. The pc and palm versions allow the emailing of results. The mobile phone version allows results to be sent by SMS to a nominated number. You can access administration feature on any device where their quiz is installed. You can access each player's:

Name
Date
Score
Quiz details

A single device can be used to test any number of people. The details of every quiz played on the device are recorded. Only the quiz creator can view or edit the results of each quiz.

Students:

Create quiz questions from you course materials and notes. Test yourself on your mobile phone. palm or laptop, wherever you are.

How can I use it?

- Playing and swapping quizzes with your friends.
 - Testing your students
 - Self-quizzing to prepare yourself for an examination
 - Creating exercises for you students.
 - Assessing your students
